Summary_

I'm a microbial ecologist with experience in computational biology and management of multivariate projects. My research encompasses soil microbial ecology and terrestrial vertebrate decomposition. I have experience with multiple programming languages, with an expertise in R and execution of microbiome data analysis. I'm passionate about open source science, reproducible research, and teaching computational skill to individuals of all levels.

\$Skills and Expertise _____

Computational Research Laboratory

R – R Markdown – R Package Development - Quarto -Git/Github -Conda – Unix/zsh

Soil sampling/Field research -Amplicon Sequencing – Data Analysis/Visualization Soil microbiome/necrobiome -Metatranscriptomics - Biostatistics -Reproducible Research – Machine learning

DNA/RNA extraction -PCR/qPCR/RT-qPCR - Cell culture -Fluorometric assays – Cell enumeriation - media/solution preparation – Cloning – Gel electrophoresis - Western blot

<u>III</u> Experience _

Postdoctoral Research Fellow (remote)

Univeristy of Michigan

Sep 2022 - present

SCHLOSS LAB

• Development of an R package for microbiome and multi-omics research/data analytics.

- · Project Team Lead, including oversight and management of progress for masters-level bioinformaticians.
- Expanding foundational knowledge of metabolomics.
- Cultivating skills in reproducible research, markdown, git/github, quarto, data analysis.
- Teaching computational skills to coding beginners at institutional workshops.

Graduate Research Assistant

University of Tennessee-Knoxville

DEBRUYN LAB

Aug 2017 - Aug 2022

- Conducted DNA extractions and 16S/ITS amplicon sequencing to characterize soil microbial succession during terrestrial vertebrate decompo-
- Led a project characterizing soil microbial gene expression via metatranscriptomics.
- · Managed multivariate datasets while gaining computational skills including Mothur, R, unix, conda, etc.
- Developed and executed methods for soil and fluid samples collection.
- Measured soil physical and chemical parameters via soil extractions and fluorometric assays.
- Managed and collaborated on multiple field experiments: responsible for preparing and executing field sampling.
- · Navigated, communicated, and collaborated with interdisciplinary research groups to accomplish grant aims and publication.

Intern (biology) United States Geological Survey

OHIO WATER MICROBIOLOGY LABORATORY

Jul 2015 - Jul 2017

- · Handled and prepared water and environmental samples from across the country for various tests such as: enumeration of enterococci, aerobic endospores, and virus plaques (1601 and 1602) and multiple source tracking.
- Analyzed and reported test results.
- · Prepared solutions and media and maintained the lab.

Undergraduate Researcher

The Ohio State University

Jan 2014 - May 2015

· Learned about protein-protein interactions to understand a suspected gene splicing product.

- Applied techniques such as cell culture and gene cloning (plasmid and site directed mutagenesis).
- Acquired skills in RT-PCR, western blotting, gel electrophoresis, and maintaining cell lines.

m Education _

PhD Microbiology

BORIS-LAWRIE LAB

University of Tennessee-Knoxville

Aug 2017 - Aug 2022

DEPARTMENT OF MICROBIOLOGY · Advisor: Jennifer DeBruyn COLLEGE OF ARTS AND SCIENCES

· Minor: Forensic Science

Teaching

Workshop on R, the Unix Shell, & Git/GitHub

U-M CARPENTRIES Dec 2023

Workshop on R, the Unix Shell, & Git/GitHub
